

Osman Korkmaz

Computer Engineering Student | Software Development Intern Candidate

osmandrafter0@gmail.com | 0536 624 48 77 | github.com/HolyMorph0

EDUCATION

Turkish Aeronautical Association
University
B.Sc. in Computer Engineering
2023 - 2027

TECHNICAL SKILLS

- Java
- C#
- SQL / MySQL
- JavaFX
- Unity 2D
- Python (basic)
- Object-Oriented Programming
- Database-backed applications
- Git / GitHub

LANGUAGES

- English - B2

RELEVANT COURSEWORK

- Object-Oriented Programming
- Database Systems
- Java Programming
- Algorithm Design

PROFILE

Computer Engineering student with hands-on experience in Java, SQL/MySQL, JavaFX, C#, and Unity-based personal projects. I develop small software applications and practice database-backed desktop development, object-oriented programming, basic UI design, and 2D game development. I aim to improve my technical foundation

PROJECTS

KORKMAZ E-DOCUMENT MANAGEMENT SYSTEM

Personal Project | Java, JavaFX, MySQL, XML/PDF | 2026

- Developed a desktop document management prototype for XML/UBL-like and PDF documents.
- Implemented role-based users, audit logs, reporting, versioning and SHA-256 file integrity checks.

2D GAME PROJECT

Personal Project | Unity, C# | 2026 - In Progress

- Developing a 2D game project using Unity and C#.
- Worked on character control, enemy movement, room transitions, reward/door logic, and basic UI systems.

VEHICLE SERVICE TRACKING SYSTEM

Personal Project | Java, JavaFX, MySQL | 2025 - In Progress

- Developed a desktop application for managing vehicle service records using Java.
- Designed the interface with JavaFX and worked on MySQL integration for adding, listing, updating, and tracking service records.

GAME FILE TRANSLATION TOOL

Personal Project | Java, SQL

- Worked on a tool intended to support the translation process of game files.
- Focused on file content processing, organizing translation data, and storing records with SQL.

INTERNSHIP OBJECTIVE

My objective is to gain practical experience in software development within a professional project environment. I want to apply and improve my knowledge of Java, SQL, C#, Unity, and object-oriented programming while contributing to team-based development processes.
